

Femern Belt Logistics Platform

- Knowledge based cluster building within logistics

The *Femern Belt Logistics Platform* is a cluster initiative which promotes regional growth within logistics and Supply Chain Management by facilitating network oriented innovations between industry, research & education institutions, public bodies and other important stakeholders within logistics in the Regions of Zealand and Femern Belt.

The platform creates synergy between existing actors within the following six thematic areas:

- Creating a Femern Belt logistics Region
- Climate Change
- Innovation
- Capacity building
- Better framework conditions for logistics
- Branding

The platform builds on the following three stages

1. Creating cross science Triple-Helix innovation networks with representatives from companies, universities and stakeholders from the public sector.
2. Identifying possibilities and challenges for regional growth and clustering within the logistics sector.

Facts about the platform:

Partners:

- Copenhagen Capacity
- Confederation of Danish Industry
- Danish Technological Institute
- Femern A/S
- Region Zealand
- Roskilde University
- Scandinavian Transport Centre
- The municipalities in Region Zealand (represented by Køge Municipality)
- Øresund Logistics/Øresund University (Lead partner)

Budget: 3,6 million DKK, whereof 2,25 comes from *Vækstforum Sjælland*

Duration: 2 years - 2009-2011

Femern Belt Logistics Platform has been initiated by *Øresund Logistics*; a non-profit cross-border network organization for actors within logistics in Region Zealand, the Capital Region of Denmark and Region Skåne.
